Define 'N' to be the number of boats competing in a particular race including boats receiving zero points.

Define P as the place assigned by low point scoring.

Each boat who comes to the starting line will be scored using the following formula rounded to 2 decimal places:

$$(N+1-P)/N$$

For example,

1st place finish: $(N+1-P)/N (=1.0)$

Each place thereafter receives a smaller fraction score.

The last place boat who completed the course will have a score greater than zero.

A boat which is DNS, DNF or was DSQ will receive a score of 0 by this formula.

Boats that do not compete in that race (DNC) will not be scored.
